## Module 10

### Module 10: Culminating Activities

Teachers can select one of the culminating activities listed below or create their own assignment that incorporates the learning from Perspectives.

#### Culminating Activity 1

---

Ask students to choose an interviewee from the Profiles DVD with whom they had the most in common and watch the interview. Using Activity Sheet 10.1, have them make notes in the first column about what this person said using the headings provided, and then use the second column to write about their own perspectives.

#### Culminating Activity 2

---

Working individually or in pairs, ask students to film their own Perspectives interview with someone who is attending or has recently finished post-secondary education, using the same categories as the DVD (refer to Appendix). After they present their 10 minute video to the class, ask them to explain where their perspectives are similar to their interviewee and where they differ.

#### Culminating Activity 3

---

Instruct students to prepare a five-paragraph paper outlining three personal perspectives that have changed as a result of completing this program with specific information to support their thinking.

#### Culminating Activity 4

---

Have students create a poster / collage that visually captures their learning from each theme in Perspectives.

#### Culminating Activity 5

---

Create an activity that utilizes the learning from Perspectives and integrates it with the requirements of the student's "Graduation Portfolio."

### Materials and Resources:

---

#### *Perspectives Resources:*

Perspectives DVD  
Activity Sheet 10.1

#### *Additional Resources:*
